LAMP (PHP 7) Packaged by Bitnami 7.4.30-11

LAMP with PHP 7.x packaged by Bitnami greatly simplifies the development and deployment of PHP applications. It includes the latest versions of PHP 7.x, Apache and MySQL together with phpMyAdmin and popular PHP frameworks Zend, Symfony, CodeIgniter, CakePHP, Smarty, and Laravel. Other pre-configured components and PHP modules include FastCGI, ModSecurity, SQLite, Varnish, ImageMagick, xDebug, Xcache, OpenLDAP, Memcache, OAuth, PEAR, PECL, APC, GD and cURL. It is secure by default and supports multiple applications, each with its own virtual host and project directory. Let's Encrypt SSL certificates are supported through an auto-configuration script.

Learn more about LAMP (PHP 7) on the AWS Marketplace.

By using this image, you agree to the provider's End User License Agreement.

Optional

You can add a shell script that will run on your instance the first time it launches.

+ Add launch script

You will connect to your instance using the default SSH key.

Change SSH key pair

Questions? Comments?

Automatic snapshots create a backup image of your instance.
